

RaceRoom

Tuesday 1 March was the day, the 2nd game night of this school year!

After some tricky warm-up laps, the tires were finally warm and the lights went out. We trained for 10 minutes and then drove for 10 minutes in qualifying. After qualifying the races started, there were 3 races of approximately 10 minutes per race so that everyone had enough chance to finish first.

Code Rood Borrel
20:00

Eerste 150 pilsjes zijn gratis

 = ROOD

Tomorrow Thursday 10 March we are going to have a beer at De Stokerij. The great thing is that the first 150 beers are free for our members! The dress code is red so put on something nice and come to De Stokerij tomorrow! You can register on our website

Board '22-'23 wanted

What does it take to maintain and grow a study association? That's what you learn with a board year at S.V. tapp. The great thing is that anyone can learn this!

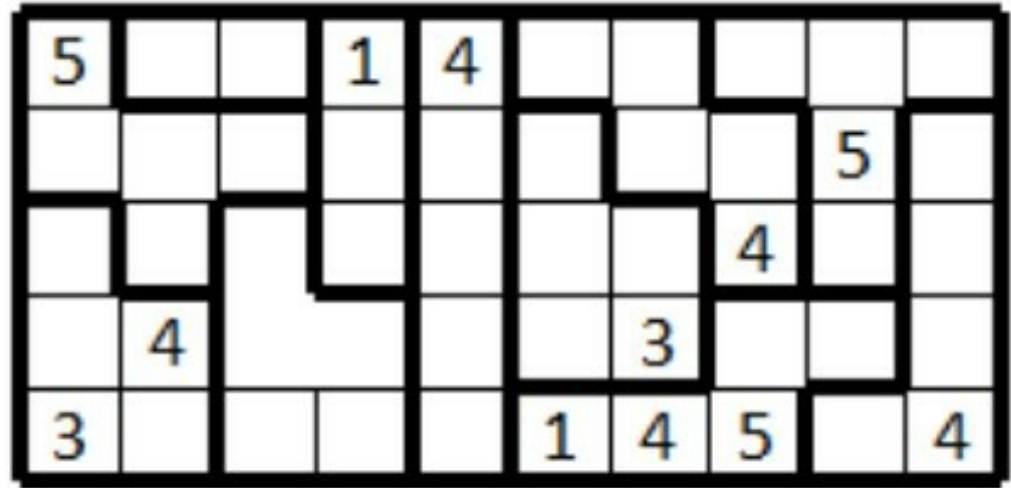

Within the board you have 5 different functions; chairman, secretary, treasurer, internal coordinator and external coordinator. To find out which position suits you best, you can read on the site what these positions entail and who is currently performing them.

You can apply from now on by sending your resume and short motivation to secretaris@svtapp.nl before 24 May. Once your email has been received, you will be invited for an introductory meeting.

I hope to see you then!

Maandelijkse puzzel

The winner of the previous puzzle is: Roos Tamming! Roos congratulations on your prize, you can pick up your prize at the office of S.V. tap. If you want to be sure that someone is present, you can make an appointment at secretaris@svtapp.nl.

The principle of a tectonic puzzle is simple. A tectonic puzzle has a diagram that is divided into blocks of one to five squares. Numbers must then be placed in those boxes. When the block consists of one box, the number 1 is placed in it. A block of two squares is given the numbers 1 and 2; in a block of three cells the numbers 1, 2 and 3 must be placed, etcetera. The intention is to fill in the diagram in such a way that boxes with the same numbers do not touch each other, not even obliquely.

Do you think you have the solution? Send an email with a screen shot to secretaris@svtapp.nl and make chance to win a nice prize!
