

Aspirant board

After a year with many changes and activities, there are 5 enthusiastic students who will take over from us. These individuals have been inspired by the board this year and are very appreciative of the progress of our beautiful study association. This is the reason why they are eager to take over from us and become the next board. We proudly present the eighth aspirant board of the study association Technisch Appèl! Next year Sam, Matthijs, Twan, Bas and Bram will fully commit to the association. We wish you all the best of luck guys!

Water skiing

The activities committee put on our last activity on June 29, we went water skiing at Grunopark! This was a great success because it was very nice and warm. Before we went waterskiing we went swimming and we played a game of volleybal on the beach. Even people who were not registered were present, super fun!

Many people could not yet water ski, which was funny because then you're all looking at each other failing. Eventually there were some people who got the hang of it. Everyone had a great time!

Excursion Steril

On June 21, the excursion committee also put down our last excursion, we went to Steril in Kootstertille!

Steril is an international company with its headquarters in Kootstertille in the north of the Netherlands.

This company has a long history in the manufacturing industry. From a long experience Steril nowadays develops, produces, markets and sells a wide range of products for the lifting of vehicles and the optimization of loading and unloading processes on distribution platforms.

Apenkooien

After a year full of activities and hustle and bustle, it was time to unwind. What better way to unwind than to let yourself go in the old fashioned way during a game of apenkooien (a combination of The Floor is Lava and Tag)

On Tuesday, June 28, our partner InWork organized a workshop apenkooien for us.

It was a great experience! Everyone showed their sporty side.

Committee certificate

The active members have dedicated themselves to the association this year and we have had a wonderful year together.

Thank you for that :)

The Hanzehogeschool is a big supporter of active students and therefore you will receive an official certificate.

Not only signed by Peter, current president, but also by the Interim Dean of the Institute of Engineering!

From Monday, July 11, your certificates can be picked up at the office. Come along! Then we will also have our picture taken together ;)

Dankwoord

With the last exams and activities behind us, we will conclude our board year at SV Tapp.

We look back proudly on the year we have accomplished with our (active) members. This year we have been to Munich with 27 students, we have held our first international event and we have established new partnerships.

Coming days we will introduce our successors on our instagram, keep an eye on it!

Everyone who has contributed to the association this year, thank you. We hope you look back on it as well as we do.

Peter van Tol
Chairman '21-'22

Are you already following us?

Besides the monthly newsletter you can also easily stay up to date of new activities via our social media! If you don't follow us yet, you can click on the icon of the social platform you want to follow us on at the bottom of this newsletter.

WhatsTapp

Are you looking for an easy way to get in touch with your fellow students?

Then we have a whatsappgroup from Tapp for you! This group is available to all members of the study association and in this group you can ask all your questions about the program. This group will also promote events that are organized by the study association.

Do you want to join this group? Click on the Whatsapp logo, through this link you can participate in the group.
